

ROCKETS: A FUN, FAVORITE SCOUTING ACTIVITY!

Model rocketry is not only entertaining and enlightening, it's also an integral part of Scouting! Scouts at all levels are involved in numerous science/space projects and activities that include the building and launching of model rockets. If you're a Scout, look into the various Merit Badges that can be earned — then ask your hobby retailer and Scout Pack leader about the Estes rockets that can make earning those badges fun AND educational!

Cub Scouts® and Brownie Scouts®

Even the youngest Scouts can learn the basics of rocketry, and have fun at the same time! The E2X® (Easy to Assemble) models recommended here can be assembled in about an hour; the Firestreak SST and Dragonite SST rockets take the simplicity even further, with Quick Snap construction that eliminates gluing!

Cub Scouts

- ★ Achievement 21 – Build a Model
- ★ Elective 1-Space – Build a model of a rocket or space satellite.

Brownie Scouts

- ★ Space Explorer Try-It

Dragonite SST
